DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Takagami et al (JP 2000-340928).

Claim 1 is drawn to a process of producing printed circuit boards wherein:

melted solid ink is jet-sprayed on an insulating substrate, leaving desired areas unsprayed;

substrate is coated with a conductive layer; and

removing the solid ink by solving.

Claim 2 further requires that the solid ink in claim 1 mainly comprises wax.

Claim 3 further requires that the jet-spraying in claim 1 is preformed by a computer.

Takagami et al teaches:

a melted thermofusion solid ink printed onto a circuit board using an inkjet method [0020 and 0023];

circuit board is coated with a conductive layer [0026-0027];

removing the solid ink by solving [0025];

a solid ink comprising wax [0023]; and

using a computer to perform a direct writing method to form a resist image [0012].

The claimed invention is found to be anticipated because Takagami et al teaches every aspect of the claimed invention.

Conclusion

No claims are allowed. All pending claims are rejected for the reasons set forth above.
